Our planning activities in the project

- ▶ PP4 will be responsible to implement accessibility solutions in Zvārde military firing ground, Latvia.

That includes:

1. The historical research of the Zvārde military firing ground, and the collection of materials. After completing the research, 5 sites will be selected.

We plan to start in December this year and complete it within 5 months.

2. The development of an augmented reality mobile application about the history of the Zvārde military firing ground.

- The preparation of audio files in 3 languages (the application will include an audio guide function).

We will do this in parallel with the historical research.

- The preparation of documents for the procurement of the mobile application development.

It is planned to start in April next year.

- The development of a 3D mobile application with sound effects.

It is planned to start in April next year and complete it within 6 months.

Our planning activities in the project

3. Site improvement- The production and installation of 2 informational stands.

Descriptions of the site and application in multiple languages.

It is planned to start in July next year and complete it within 4 months

4. Pilot testing and completion of accessibility solutions

5. The production of video clips.

Possible objects

Poster at the entrance to the Zvārde polygon area (historical photo).

Possible objects

Virsnieku kurgāns (Officer's mound) Only ruins remain today.

Possible objects

This is an illustrative photo - there is nothing in common with Zvārde polygon, but it is known that the area of the polygon contained models of aircraft and tanks, which served as bombing targets (the approximate locations are known - the research results should clarify what these models looked like).
